- High Risk Activities
- ...any accident

# CONCUSSION SCREENING SOLUTIONS

**My Safe Pass (MSP) Olfactory Scent Test is an innovative, inexpensive, easy-to-use, rapid (60 seconds) screening tool** to detect mild to moderate scent loss. Decades of clinical peer-reviewed, published research shows olfactory dysfunction is often the first, earliest, and sometimes only, indicator of many neurologic conditions, including concussions/TBIs. **MSP is a quick and easy screening tool for trip leaders, camp directors, and medical staff to assess health, preventing second impact syndrome.**

## WHY MY SAFE PASS?

- ✓ Affordable, rapid, non-invasive, accurate screening
- ✓ Stock in first aid kits, excellent for trip & travel programs
- ✓ 60 seconds to take test on average
- ✓ 97% Specificity, 87% Accuracy, 3% False Positives
- ✓ FDA Class 2 Medical Device (510k Exempt), HIPPA Compliant

Simple To Use
